

**SPECIAL BLACK –
GLOSS INK PIGMENT BLACK**

ELFTEX® 415

ELFTEX® 415 pigment black is a low structure specialty black pigment designed to impart high color strength and gloss in lithographic gloss inks.

Product Form: Powder

Application Information

Lithographic Inks

ELFTEX 415 pigment black is used primarily in lithographic gloss ink applications where good color strength and high gloss are required. Because of its low vehicle demand, it is particularly well suited for applications where a highly loaded base is desired.

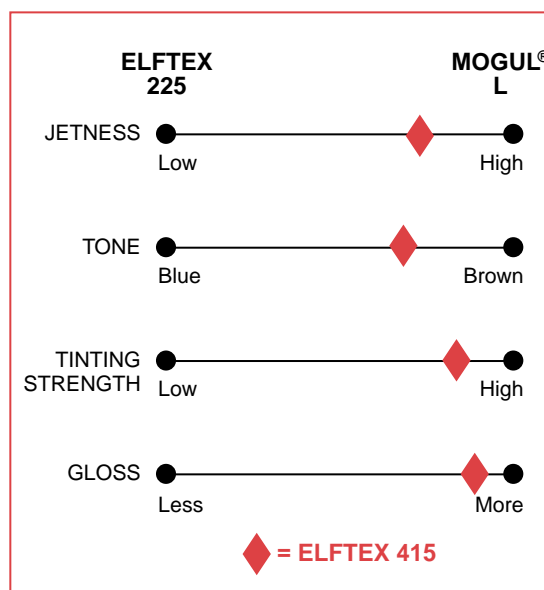

Liquid Inks

ELFTEX 415 pigment black is also very applicable in liquid inks requiring high gloss and low viscosity.

The dispersibility of ELFTEX 415 pigment black depends on the equipment used and the formulation.

ELFTEX 415 is a powdered pigment black with a typical bulk density of 400 g/L. It is also available in an easier to handle pelleted form ELFTEX® 410.

Performance Comparison to Other Gloss Ink Pigment Blacks

Packaging Options

Multi Unit	Intermediate	Bulk
12.5kg paper	850kg Big Bags	Not Available
